

Data explanation for Tara's project

Created by TC on 03/17/2020

Updated on _____

Hi Tara and Nandini,

I wish you both the best on this important project. Below is a quick explanation of the information that I have shared with both of you. This is highly confidential data. I trust that both of you will not be making copies or sharing it with anyone else.

Pre- and Post-Tests

Within pre- and post-tests, you have...

- An example Eberly report (to see how to run the analysis)
- Information on measures (this explains each of the measures [I am missing Self-Efficacy and I have sent Mike Melville and e-mail to get a reference for that])
- Pre- and post-tests for AY18–19 and AY19–20 (these include the forms and the data)
- Draft of the current form with notes and explanations (I made this for myself, but I think you may find it useful to go over)

Initial Consultation

You have access to the Initial Consultation data. I believe that this should include last year's data as well. If it does not, please let me know and I will find that.

Academic Coaches Roster

This is a roster with all Coaches from this year. You will need this to clean the data for which Coach a student had because the student wrote in the Coach's name (so inconsistent and occasionally errors).
